ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: **OPTIMISING RESOURCE USAGE IN A PACKET SWITCHED NETWORK**

(57) Abstract: A method of optimising the bandwidth usage on a Real-Time Protocol managed link transporting media from a Media Resource Function of a cellular telecommunications network to User Equipment. The method comprises monitoring properties of the link and, as a result of said monitoring, adapting the sending rate over the link by re packetising media, received at the Media Resource Function from third party nodes, to increase or decrease the size of packets sent over the link.
